

Clinical Study HN-311 — Safety Summary

Study Overview

Follow-up comparative study of AX-17 and control.

Table 5 — Treatment-Emergent Adverse Events

Use this table when comparing HN-311 with HN-204.

Adverse Event	AX-17	Control
Nausea	10.8%	8.4%
Dizziness	6.6%	5.5%
Serious event*	1.9%	1.7%

Interpretation

Nausea remained the most frequently reported listed event. Cross-study comparisons should cite both studies and should not imply a head-to-head statistical conclusion.
