

Postmortem — Checkout Error Spike — 2025-11-28

Summary

Checkout 5xx errors increased after a configuration deployment. Historical symptom was similar to PAY-5037.

Timeline

14:30 deployment; 14:34 errors increased; 14:38 rollback started; 14:43 service recovered.

Root Cause

Connection pool limit was reduced unintentionally by deployment configuration.

Lesson

Historical similarity is useful evidence but must not be treated as proof of current causality.
